

APEX
YACHTS

A NEW INTERNATIONAL YACHT BRAND
DEDICATED TO DELIVERING TRUE LUXURY
AND TOTAL PERFORMANCE.

INSPIRED BY OUR LOVE OF THE SEA,
OUR BOATS ARE DESIGNED FOR THOSE
WHO SHARE OUR PASSION AND ENJOY
LIFE TO THE FULL.

OUR STORY

Our story begins with the simple realisation developed over the years that no matter the boat, there are always areas that can be improved.

At Apex Yachts we have decades of experience both as boat builders and boat owners. During this time, we have had the pleasure of cruising around on a multitude of different boats – fast and sedate, simple and luxurious, traditional and cutting-edge.

Although we have loved them all for their individual virtues and for the freedom they provide, we have never found ourselves sitting in the 'perfect boat'.

Whilst our ambitions are high, our immediate goal is to build a boat that improves on others in this sector – with higher performance, greater comfort, more practicality and a touch of elegance and luxury not normally found on small boats.

We assembled a team including first class naval architects, designers, boat builders and a technologically advanced and extremely professional shipyard to realise our vision.

We hope that by combining the best features of boats we have experienced in the past, along with our collective understanding as dedicated customers, designers and builders, we can create a superior product.

Our first boat, Apex 60, represents our initial step along this journey – to build a day tender that offers the perfect combination of engineering and design. A day boat created for those seeking thrills and spills or a day of effortless relaxation. For the adventure of discovering a secluded beach or entertaining friends over sunset drinks.

Whatever your pleasure, we hope you will find it riding one of our boats.

OUR PHILOSOPHY

At our core, we believe in excellence.

We believe that stylish design combined with advanced technology and first class materials, applied by exceptional craftsmen with an outstanding work ethic, will yield the greatest chance of creating the ultimate boating experience.

Our shipyard is in Sardinia, but we are international in our outlook. Our naval architects are Italian, designers and technology German, and we continually search the world for the finest materials for each component, whether the luxurious leather upholstery, innovative paints and coatings or advanced electronics.

We are uncompromising in our approach to comfort and performance.

We believe that a true luxury experience considers all aspects of your time spent on board as well as of course how the boat sits in the water.

We envision a future where each boat is custom-built, following specific detailed requirements, delivering that 'perfect boat' for each client.

We aspire to keep challenging ourselves to push the boundaries and to continue delivering our unique blend of high-powered performance and elegant comfort.

DESIGNED FOR COMFORT,
ENGINEERED FOR PERFORMANCE

APEX 60

Designed to offer the perfect combination of performance, stability, comfort and elegance, the APEX 60 is the embodiment of our philosophy.

The sleek and aggressively sporting exterior lines convey an understated aesthetic, while the fibreglass and composite hull and reduced noise and vibration of the Volvo Penta IPS engines deliver the smoothest of rides.

Traditional teak decking accentuates the ultra-modern design of the furniture and fittings that follow the principles of both form and function.

The stern provides unobstructed access to the boat and a large sunbed covering storage boxes containing all the necessary switches, sockets and docking station.

A flexible dining and lounge area includes an adjustable height table and beautifully upholstered sofas with built-in storage. The multi-functional kitchenette can also be covered to provide extra seating for guests or a rest for the captain while piloting the boat.

A comfortable walkaround with built-in carbon railings, provides safe movement at all times and easy access to the bow of the boat and its huge sunbed area for all-day lounging and enjoying the thrill of riding across the waves.

APEX 60 has been specifically designed to be a flexible day tender, equally equipped for a full day out exploring the coastline or a fun party boat.

DESIGNED FOR COMFORT

Luxurious, functional and very stylish, are the words that best describe the interior of APEX 60.

Designed in collaboration with Munich based Egg and Dart Design Corporation, the interior design continues the sleek lines of the exterior whilst providing the finishing touch of comfort to fully express the unique character of the boat.

A spacious layout of the interior comprises a generous and comfortable salon with fully equipped galley, guest toilet, plenty of storage and a beautifully appointed owner's cabin with flexible seating and sleeping area in a very private space.

The peak of style and function is the owner's bathroom, fitted with a separate shower and all you need to get ready and step back onto shore fully refreshed and dressed for the next part of your day or night.

The interior finishing includes walls made from the finest custom embroidered leathers and premium hi-tech fabrics for all the seating areas. A specially made bronze metal paste finish for the furniture surfaces is a design highlight with matching fittings.

The gentle bronze and cream colours combine with a distinctive lighting concept to deliver a warm and elegant relaxation space.

ENGINEERED FOR PERFORMANCE

More than beautiful design and luxurious comfort, the APEX 60 it is at heart a high performance craft.

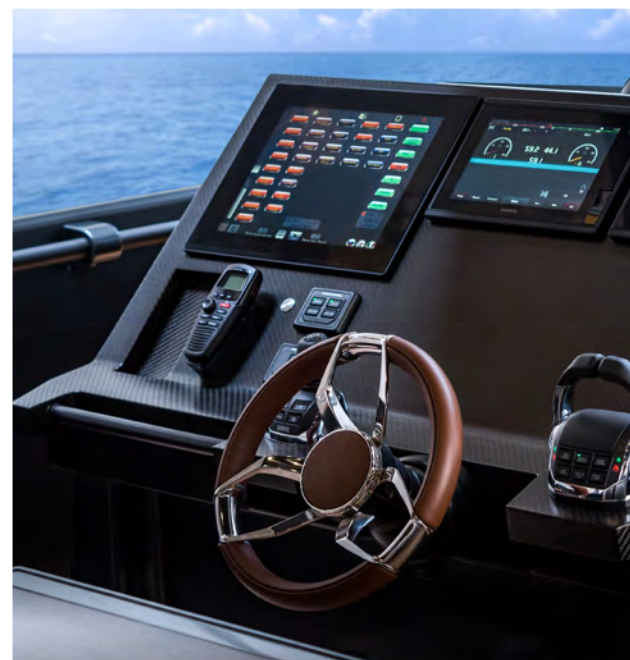

Three Volvo Penta IPS (Inboard Propulsion System) engines deliver faster acceleration and higher speeds, up to a maximum of 40 knots.

The joystick controls and POD drive propulsion provide greater handling responsiveness and increased manoeuvrability to make docking easier and safer.

In addition, the engines offer significantly reduced fuel consumption while also improving the overall cruising range. Reduced noise and vibration coupled with exhaust gases directed out through the drive units underwater make for an overall superior experience.

The PLC (programmable logic controller) system by Allen-Bradley has a waterproof touchscreen interface installed in the wheelhouse. It allows for automatic and manual management of the electro-mechanical system as well as the physical parameters.

DESIGN FEATURES

- ✧ Fully automatic stern boarding passarelle / stepladder that can be inclined up to 45 degrees upwards and downwards
- ✧ Removable carbon standing shower pole on deck with automated water connection
- ✧ Kitchenette fully equipped with fridge, ice maker, teppanyaki hot plate, sink and ample storage
- ✧ Separate hardware back-up for main system controls
- ✧ 220v AC outlet
- ✧ Hard top with integrated photovoltaic panels for charging and maintenance of service batteries
- ✧ Submarine anchor
- ✧ Optional extra solar shade for rear sunbed
